

# Google agenda in Thunderbird Lightning

## 1. Activeer Lightning

**Vanaf Thunderbird 60 is Lightning geïntegreerd, en worden verouderde add-ons niet ondersteund:**

- Verwijder eventueel geïnstalleerde add-on
- Ctrl+Alt+T
- `sudo apt install xul-ext-lightning`
- Herstart Thunderbird
- Klik  **Venster Vandaag** ▼ om de agenda wel of niet te tonen.

*NB: Deze 'toggle' staat **rechts beneden** op het scherm.*

## 2. Installeer Provider for Google Calendar

- Open het Thunderbird menu
- Klik **Add-ons → Add-ons verkrijgen**
- Typ **provider** in zoekregel
- Klik **Toevoegen aan Thunderbird**
- Klik **Nu installeren**

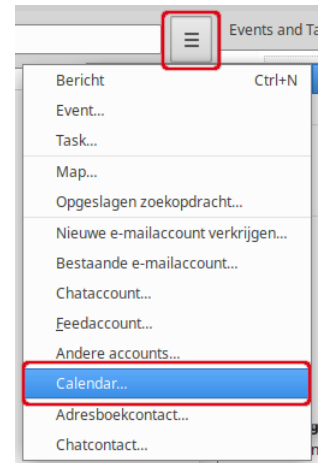

- Klik **Toestaan**
- Klik **Nu herstarten**

### 3. Voeg account toe

- Klik het Thunderbird menu
- Klik **Calendar...** (Agenda)

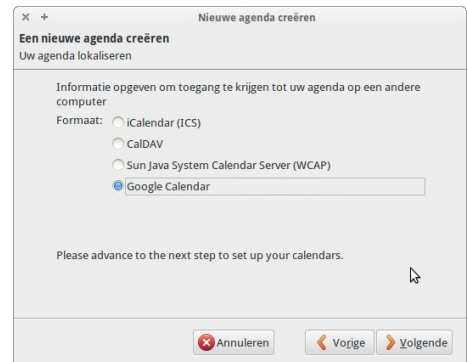

- Kies **Op het netwerk**

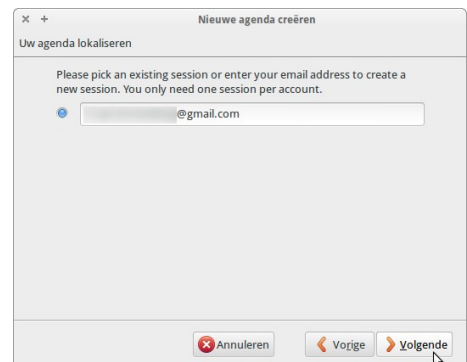

- Klik **Volgende**

- Kies **Google Agenda**

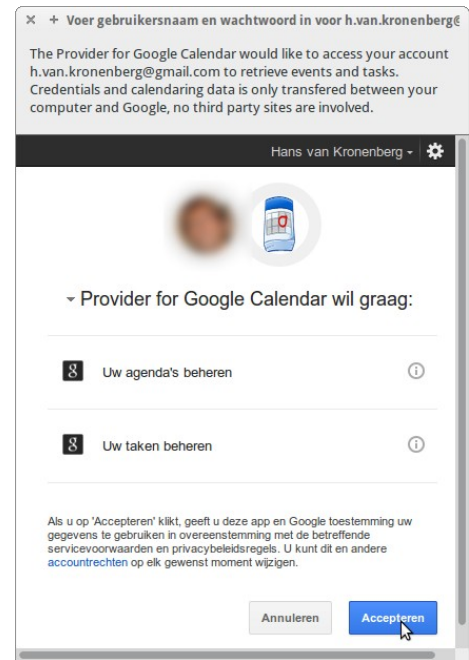

- Klik **Volgende**

- Vul Google email adres in

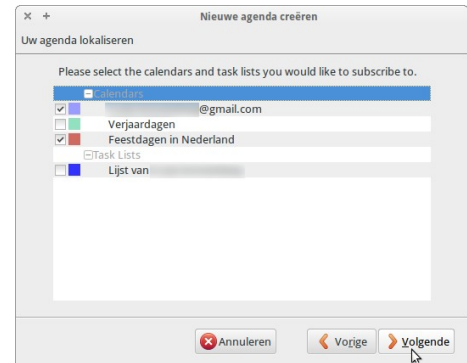

- Klik **Volgende**

- Geef Google e-mail adres en wachtwoord
- Klik **Inloggen**
- Klik **Accepteren**

- Klik **Volgende**

- Klik **Voltooien**
